Landscape Service

OUR AIM, AMBITION AND OBJECT

We are here to serve you in helping to develop the resources and beauties of Talbot County and the Eastern Shore.

The plants listed in this booklet are especially adapted for this locality, its soils and climate.

OUR ORGANIZATION AND EQUIPMENT

Our practical knowledge and long experience is our chief asset backed up by the youthful energy and enterprise of university graduates in Landscape Architecture and Floriculture, with a special knowledge of plant life on the Eastern Shore.

LOCATION

Situated about 2 miles out of Easton on the Dover Road Route 213, the main road between Easton, Salisbury and Cambridge.

DELIVERY

Delivery free within a radius of 10 miles of the nursery.

Complete landscape and planting service.

GUARANTEE

We will replace any plant that does not commence to grow when supplied and planted by us.

Plants purchased from us and planted by the customer will be replaced at half-price, should failure ensue.

PRICE LIST

The following list, with few exceptions, may be planted in the fall, from September until the ground freezes.

Spring planting commences as soon as weather conditions permit.

The American Holly

Would you be interested in a holly hedge on your estate? It is hardly necessary to say what a beautiful picture it would be if properly located.

It has always been a mystery to us who are quite familiar with what the English have done with the holly in their gardens, why the American Holly has not come into its own in this country.

Just because it is rather difficult to transport from the woods is no proof that the Holly when nursery grown is not easily transplanted and a vigorous grower.

We do not wish to sell you a holly hedge unless it would be a success.

In approved positions and planted by us or under our supervision we guarantee success.

We should be glad to call and talk over the subject with you.

HARDY WATER LILIES

There is nothing more fascinating than Water Lilies in the garden. The smaller the garden the more desirable is the delightful feature of a pool even if it only be a half a barrel sunk in the ground.

The needs of the Water Lilies are the same whether they are grown in a tub sunk in the ground, a concrete pool or a natural pond. Full sunshine, rich soil and warm shallow water.

WATER LILIES

ATTRACTION:—A brief description is, garnet with tips of petals shaded a light rose. In rich soil the flowers lift themselves well out of the water and measure 8 inches across ----- \$2.50

CHROMATELLA:—The best yellow water lily -- \$1.50

GLADSTONE:—The queen of white Water Lilies. Dazzling white large and strong grower, 6 to 8 inches across ----- \$1.50

HOPATCONG:—An exquisite small white ----- \$1.00

INDIANA:—A vivid combination of shades of copper, and wine color ----- \$1.50

JAMES BRYDON:—This variety was the general favorite of the many visitors to our Lily Ponds. The color is a rich rosy crimson, beautifully shaped, large flowers and rich foliage ----- \$3.00

ROSE MAGNOLIA:—Most delightful, delicate pink, the flowers stand well out of the water and a very free grower ----- \$1.00

PINK OPAL:—Rich pink, vigorous grower and produces an enormous quantity of flowers. A splendid kind for naturalizing in ponds ----- \$1.00

ROSE AREY:—Deep cerise pink, very delicate and lovely ----- \$1.00

SIOUX:—A blend of copper and apricot.
An exquisite variety ----- \$2.00

NELUMBO NUCIFERA, The Japanese Sacred Lotus:—The large round leaves stand 2 to 3 feet out of the water, the flowers stalks above them. Blooms over a period of two months, the individual flowers lasting 2 to 3 days. The color is exquisite rose pink. To grow it to a perfection it requires deep rich mud and plenty of room so that if grown in a tub, the tub should be at least 3 feet across and 18 inches deep ----- \$5.00

NELUMBO LUTEA, The American Lotus:—Very much like the Japanese Lotus, but with large pale, lemon yellow flowers, equally as beautiful as the pink -- \$5.00
